TERMS OF REFERENCE

1. INTRODUCTION

The NHFC, a Schedule 3A Development Finance Institution (DFI) of the National Department of Human Settlements, was established in 1996 with the principal mandate of broadening and deepening access to finance for the low to middle income South African households.

The target market of the NHFC is the low-to-middle income housing market which typically includes households who earn between R3 500 and R22 000 per month. The NHFC mandate requires the company to make housing and housing finance accessible and affordable to facilitate this objective.

This is done through:

- providing wholesale funding to housing development projects for ownership, social housing and private rental, including inner cities, and for incremental housing purposes;
- partnering with banks and other non-banking retail financial intermediaries to increase their sustained lending and innovation in the target market served; and
- Leveraging private sector funding for the sustainable development of human settlements.

More specifically, NHFC's strategic priorities are to:

- Expand housing finance activities, through the effective provision of housing finance solutions, enabling low-to-middle income households to have the choice of renting, owning or incrementally building to meet their housing needs;
- Facilitate increased and sustained lending by financial institutions to the affordable housing market;
- Mobilise funding into the human settlements space on a sustainable basis, in partnership with a broad range of institutions;
- Conduct the business activities of the NHFC in an ethical manner that ensures the continued economic sustainability of the NHFC, while promoting sustainable social and environmental development; and
- Stimulate the low-to-middle income housing sector by providing robust, relevant and timely research and market analysis to practitioners and housing customers.

2. PURPOSE OF REQUEST FOR PROPOSAL (RFP)

The purpose of this Request for Proposal (RFP) is to solicit proposals from potential bidders for the provision of consulting services for the review (financing arrangements, effectiveness, risks, sustainability & impact) of current mechanisms/instruments of the social housing financing model to NHFC. This RFP document details and incorporates, as far as possible, the tasks and responsibilities of the potential bidder required by NHFC. This RFP does not constitute an offer to do business with NHFC but merely serves as an invitation to bidders to facilitate a requirements-based decision process.

3. REQUEST FOR PROPOSAL BACKGROUND INFORMATION

Social housing in South Africa, has been identified as a strategic priority by the Government of South Africa. The Department of Human Settlements (DHS), via the Social Housing Regulatory Authority (SHRA), has committed substantial resources to the sector through capital grants which are augmented with provincial subsidies to fund the sector. In Financial Year 2019/20, R723 million has been set aside by the Department of Human Settlements through a budget allocation to the SHRA which is expected to facilitate an estimated 4,700 social housing units. These grants are matched with senior debt funding to complete the respective projects. For the MTSF period 2021 to 2025, the DHS expects delivery of an estimated 30 000 social housing units and the associated grant budget will be in the region of R4.7 billion with complementary debt expected to reach R2.4 billion.

Social housing is regulated by among others, the Social Housing Act 2008 which has defined the key role players in the delivery of social housing, the main one being the SHRA, largely responsible for grant investment and for regulating accredited Social Housing Institutions (SHI's) central to the delivery of social housing. Social Housing is currently targeted at households earning R1 500 up to R15 000 per month and rentals charged by institutions are regulated.

Social housing as a sector, is experiencing a number of challenges that threaten the sustainability of the current funding model. The challenges are multifaceted and present themselves in SHI's defaulting on loan commitments not only to the NHFC but to other financiers. The challenges are summarised below and further elaborated under various problem statements.

Challenges are summarised as follows:

- Critical operational efficiency targets as set by the regulator (SHRA) are consistently not being achieved by SHIs, negatively affecting profitability and operating cash flows;
- Policies/Regulation that is not aligned with market forces (e.g. regulated rentals and income bands are not adjusted annually for inflation);
- Inability to enforce legal rights by the Regulator, the NHFC (the main debt provider in the sector) and SHIs, mainly due to outside interference by other stakeholders and political proponents;
- SHIs not growing fast enough to reach the adequate scale, that translate to sustainability and
- The dependence of SHI's on public sector funding and the limited participation of the private sector which possesses significant capital resources.

The challenges are further elaborated on below.

PROBLEM STATEMENT 1

Social Housing projects receive substantial grant funding of up to two thirds of project costs with the balance being debt-funded. Notwithstanding the significant grant contribution, projects approved/accredited by the SHRA remain marginal requiring significant and careful structuring of debt to ensure viability.

Aspects related to poor financial viability or weaknesses in the financial model generally include:

- Weaknesses of the funding model that arise due to policy and regulatory constraints.
- No equity contribution to funding of projects by the Social Housing Institutions (SHI). The current social housing delivery model relies heavily on SHI's that are non-profit companies (NPC's), which means that there is no shareholder's equity required and therefore no shareholder to hold the SHI to account.
- The Boards of SHI's are also its management, which compromises the quality of oversight and general corporate governance. There is no financial commitment required from sponsor Directors/management particularly when SHI's are Not For Profit Companies (NPC's) and it is suspected that they participate to benefit from project construction fees and salaries generated from rent collection. There is "no stake in the game" that forces them to be concerned about the long term sustainability of social housing.
- Project cost over-runs that occur during construction cannot be funded by these SHI's. This cost shortfall risk ends up being funded in the main by the NHFC loans, which in certain instances, render the project financially unviable due to the interest servicing costs;
- Lack of inflationary adjustment in income bands by the SHRA. The income bands were last adjusted in February 2018 after being static/constant for over eight years prior to that. The primary market has a cap of qualifying persons set at a maximum income of R5500 per month and the secondary market, has the upper threshold set at R15 000 per month. These thresholds are not adjusted upwards in line with inflation, and while understanding the motive to provide affordable housing for the most vulnerable, it means with escalating above inflation operating costs (property maintenance, security, municipal utility costs etc), financial viability is eroded every year;
- Operational efficiency and financial management disciplines are not well respected disciplines in the social housing sector. This typically results in inefficiency building up over time in the businesses with respect to key ratios like cost to income ratios. For example, based on the end of March 2019 SHRA Quarterly Report to the Department, only six of its 28 SHIs were able to meet its benchmark of R1 350 operating expenses per unit. With an additional nine (9) with total operating costs of R1 350 to R2 000 per unit per month

PROBLEM STATEMENT 2

Continued use of NPC's as delivery agents for social housing has not been exemplary, as the best vehicles for achieving sustainability, over a long term. The other reason is that, as an NPC, the members have no skin in the game or will not suffer in the long run if the project is not successful. The NHFC Board Credit and Investment Committee (BCIC) is concerned that lenders like the NHFC are ultimately left with the burden of running these institutions as the bondholders. The question arises whether the SHI funding model is viable and sustainable and whether the NHFC is acting as bank of last resort, having to fund short term cash flow shortfalls due to various uncontrollable events, and long term loan repayment whilst being hindered to apply the law.

PROBLEM STATEMENT 3

The causes and impact of rent boycotts as well as illegal occupation of units to the social housing sector. In the most recent past, the Social Housing Sector's risk profile has increased. One of the contributing factors is the socio-economic challenges and criminality in the sector which has given rise to illegal occupation of units and rental boycotts from tenants. In some cases up to 25% of select housing projects are not generating revenue income for the SHI's placing them under severe financial strain given the already tight operating incomes being generated from the regulated rentals.

PROBLEM STATEMENT 4

Interference by key stakeholders hampering the NHFC exercising its rights in terms of loan agreements it enters into with SHI's. In the cause of perfecting its security, it is not uncommon for key stakeholders to interfere by requesting for the suspension of such actions.

PROBLEM STATEMENT 5

The viability and sustainability of various SHI's which are classified as Non-Performing Loans by the NHFC as they are more than 90 days in arrears. These SHI's jeopardizes the NHFC sustainability due to loan covenants of foreign and potential local funders being in breach, implying default and could result in demands for repayment, negative audit findings etc. Needless to mention that these covenant breaches also impact on key performance ratios of the Corporation.

PROBLEM STATEMENT 6

Significant reliance on public sector funding within the sector providing little attraction to the private sector as an investment vehicle. NHFC is currently the largest financier of social housing, a situation that is increasingly becoming undesirable and unsustainable in view of the need out there and what its balance sheet is able to handle. There exists substantial capital in the private sector which is untapped potential for the sector.

4. SCOPE OF WORK

The successful service provider will be required to render the following services to NHFC:

- 4.1 The appointed service provider to review the **current social housing financing/funding model** (financing arrangements, effectiveness, impact, risks and sustainability) and make recommendations for long term financial sustainability of the model as well as of funding arrangements at project level. This exercise will entail engagement with the SHRA, the NHFC, other Lenders and National Association of Social Housing Organisations (NASHO), Department of Human Settlements, Water and Sanitation and the National Treasury.
- 4.2 The appointed service provider is to review the current mechanism that relies heavily on grant funding and NPC's and make recommendations on improving the existing model or proposing alternative financing and delivery models.
- 4.3 The appointed service provider to review the impact of rental boycotts and illegal take-over of developments to the long term sustainability of the social housing operational model and make specific recommendations for consideration by a broad spectrum of key stakeholders (Lenders, SHRA, NASHO, National Treasury, NDOHS, Provinces & Municipalities) involved in the funding and financing of social housing. Upon review, the service provider to propose among others:
 - appropriate risk sharing mechanisms by all relevant stakeholders to mitigate defaults to lenders so that sustained lending in the sector is maintained;
 - suggest mechanisms for co-operation between stakeholders before litigation is envisaged;
 - mechanisms that must be put in place between the stakeholders pertaining to interaction and roles with regard to defaulting SHI's
 - Legislative challenges and shortfalls within the social housing sector.

The service provider may need to consider and identify related triggers (risks) behind such actions arising from socio politico economic factors, police inability to enforce evictions or deal with invasions etc.

- 4.4 Review the present policy and regulatory framework and to make specific recommendations to enhance the framework to ultimately clarify roles and legal consequences of interference with the lender's rights.
- 4.5 It is now timely that alternatives that will leverage lending by the banks and other private institutions are considered, in this respect, the consultant is expected to make practical implementable recommendations on a financing model that will limit NHFC exposure to social housing but at the same time attracting private investors to participate on a larger scale.
- 4.6 **Comprehensive Final Consultancy Report** addressing all the problem statements above and the issues listed below:
 - An overview of the key challenges in the social housing sector categorised by nature; e.g. legislative (poor policy), Regulator's capacity shortcomings, operational, debt funders etc;

- The impact of the challenge on the sector from a financial viability point of view and a determination if the SH sector is currently un-bankable not only for the commercial banks but also for DFI's – to also make specific recommendations that will make the sector bankable if currently deemed un-bankable;
- Possible solutions to challenges raised (analysed between short, medium and long term). Also focus on providing a blue print what you consider as the key pillars required to attract additional funding to the sector and
- A benchmarking on other social housing funding models in the rest of the world to determine the key pillars/ingredients on success and consider whether those are in place in the South African social housing market.

4.7 Presentation to the Executive Management team of the NHFC on the key findings and solutions/recommendations.

5. KEY QUALIFICATIONS OF THE CONSULTANT /FIRM TO EXECUTE THE ASSIGNMENT:

- Research/Consulting in financial services and grant funding;
- Core capability in Investment/Finance Consulting in Housing/Affordable Housing/Social Housing or Risk and Financial Management Consulting in the lending/investment and or development finance space and

CERTIFICATE OF INDEPENDENT BID DETERMINATION

This Standard Bidding Document (SBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price proposals, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
